Our Story

Built on Craftsmanship, Engineering, and Swiss Reliability

LivinVino was created with one clear belief: cigar storage should be beautiful, but above all technically correct. Cigars are highly sensitive to humidity and temperature changes. When conditions fluctuate, aroma, burn quality, and long-term aging are affected. That is why we design humidor solutions where design and performance work together.

Founded by a storage specialist with over 10 years of hands-on experience in Switzerland, LivinVino has delivered refined, custom-built projects for private collectors and professional spaces ranging from elegant humidor cabinets to dedicated cigar rooms designed for stable aging and premium presentation.

To guarantee long-term stability, we collaborate with trusted engineering partners with 30+ years of expertise, ensuring each project meets demanding standards for humidity control, airflow quality, and reliability.

And because a humidor must stay stable over time, LivinVino works in partnership with Wine Guard to provide strong after-sales support and maintenance so your installation remains protected year after year.

Custom Cigar Storage

Humidor Cabinets & Cigar Rooms On Measure

LivinVino designs and builds tailor-made humidor cabinets and custom cigar rooms in Switzerland. Each project is created around your space, your collection size, and the atmosphere you want—discreet and integrated, or a true statement piece.

Our cigar storage solutions are engineered for what matters most: stable humidity, consistent temperature, and clean airflow. This protects wrappers, preserves aroma, and keeps cigars ready to enjoy year-round.

Your humidor can be configured with:

- **Capacity & layout** trays, shelves, drawers, display zones
- **Materials & finishes** refined interiors and premium exterior finishes
- **Glass & doors** clear or tinted glass, framed or minimal designs
- **Security** discreet locking options for private collections
- **Lighting** elegant illumination for display and comfort
- **Performance setup** engineered humidity control and airflow suited to the project configuration

Humidor Cabinets ON MEASURE

Tailor-made cabinets for daily enjoyment and long-term aging.

Our custom humidor cabinets are designed around your collection size and your interior style. With stable humidity control, clean airflow, and premium materials, they offer elegant display and reliable protection ideal for private collectors and curated hospitality spaces.

- Solid Wood Finishes
- Spanish cedar shelves
- Warm LED lighting
- Smart Lock

Integrated Cigar Humidor

- Stainless Steel Finishes
- Spanish cedar shelves
- Warm LED lighting
- Concealed Door Handles

Walk-in
CIGAR ROOM

A Dedicated Space for Perfect Aging and Experience

A walk-in cigar room is the highest level of cigar storage. Beyond climate control, we design the interior architecture of the room made-to-measure cigar furniture, refined storage walls, display shelving, and elegant presentation features.

Integrated Walk-in **CIGAR ROOM**

Seamless Architecture, Controlled Conditions

An integrated walk-in cigar room is designed to feel like part of the interior not an added box. We blend the cigar room into the architecture with clean lines, refined finishes, and made-to-measure storage furniture, while maintaining the technical performance required for proper cigar aging.

Integrated Walk-in Cigar Room

- Reference Size: L180*L180*H285cm
- Spanish cedar shelves
- Warm LED lighting
- Quiet low-vibration cooling

Cigar Lockers and Member Storage

Secure Personal Storage for Lounges and Clubs

Cigar lockers create a premium member experience in lounges, hotels, and private clubs, offering each client a secure personal space for their collection.

LivinVino designs made-to-measure locker systems with clean detailing, discreet security, and layouts adapted to the venue. Each project is engineered for stable humidity, consistent temperature, and clean airflow so cigars remain protected year-round.

Finishes

Solid Wood

A warm, timeless finish with natural grain and depth ideal for luxury interiors and classic cigar spaces.

Wood options on request

Wood-Effect Finish

A refined wood-look finish created by water-transfer on metal surfaces, offering a clean, durable result with consistent grain.

Wide selection available in many variations.

Stainless Steel

A clean, architectural finish known for durability and a high-end modern look perfect for hospitality and contemporary interiors.

Stainless Steel Colors

Stainless steel finishes are available in many tones and effects (light, dark, warm, bronze, etc.). We present the full range during material selection to match your project precisely.

Interior Wood for **CIGAR STORAGE**

The interior wood affects humidity stability and the aroma of your humidor. **Spanish cedar** is the most common choice because it helps regulate humidity and protects cigars naturally. We can also offer other wood options, such as **mahogany**, to match your style.

Our Process

From first site visit to final installation, every detail is planned for seamless integration and reliable wine preservation.

01 On-Site Concept

We review feasibility, define the location, capacity, and the experience you want (cabinet, room, or lockers).

02 Design & Engineering

You receive a complete project file with technical drawings and full specifications, with 3D visuals available upon request validated before quotation.

03 Quotation Approval

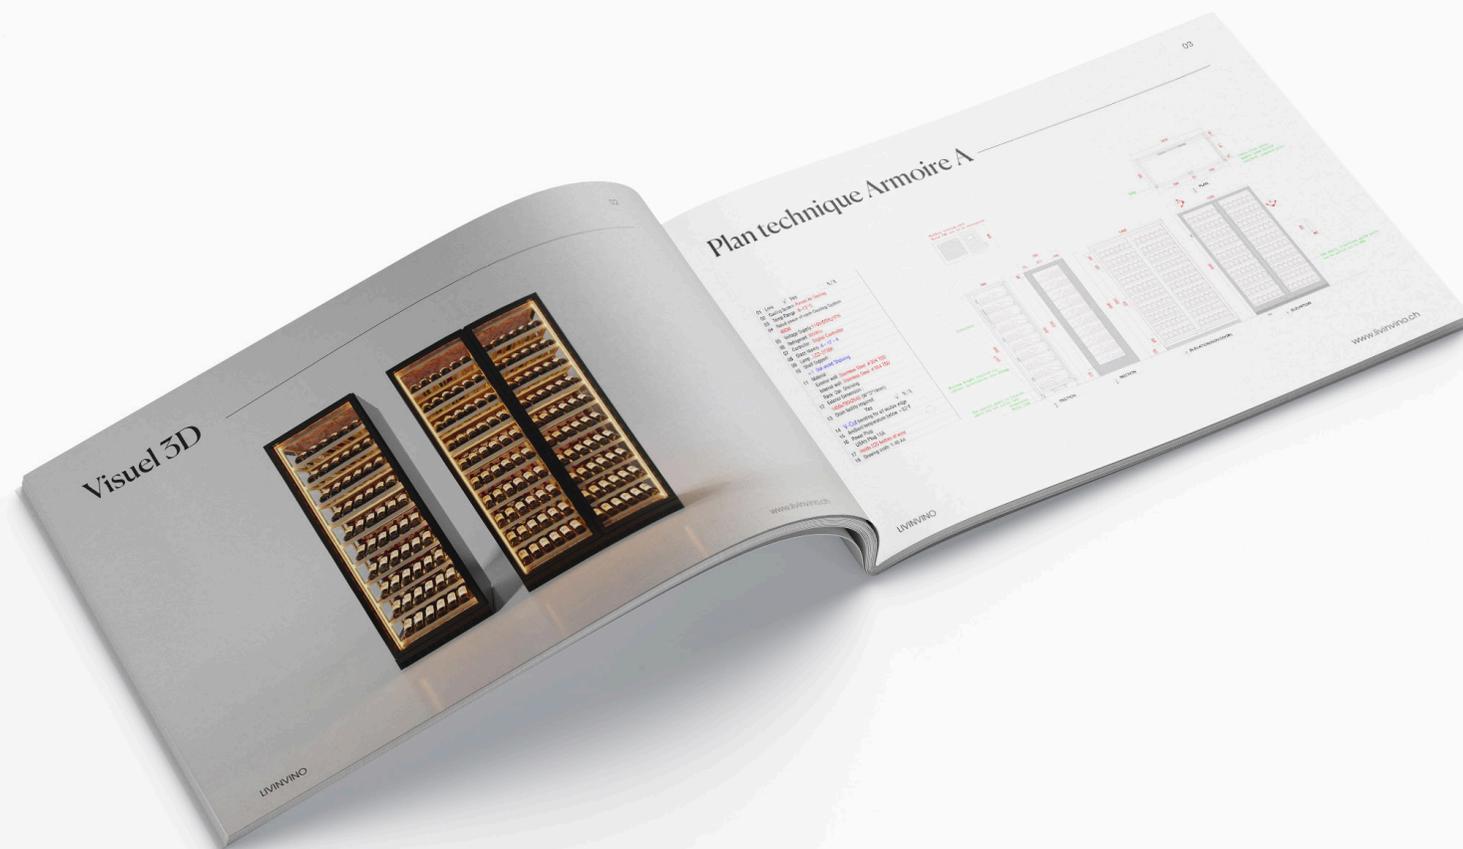

Signature and deposit confirm the project and secure your production slot.

04 Fabrication

Built to order within our production schedule (90–120 days). This lead time allows precise craftsmanship, custom finishes, and full quality control.

05 Delivery & Installation

Installed on-site by experienced technicians with precise alignment and clean integration. We complete a final functional check to ensure everything operates correctly before handover.
